PROFESSIONAL SUMMARY

AI/ML Engineer with a live internship at Hebbrix and projects spanning agentic AI, knowledge graphs, and predictive modeling. Proficient in Python, Scikit-learn, LangChain, and LangGraph — 270+ LeetCode problems solved (rating: 1394) change for full stack and interned at Artizence as Web dev intern

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 8.619/10.0
Intermediate (Class XII)	2022 - 2024
FIITJEE Junior College	Grade: 92.4%

INTERNSHIPS

AI ML Intern	March 2026 - Present
Hebbrix	Remote
- Optimized LLM-based retrieval pipelines, reducing latency and improving response time in production - Designed and executed test cases for AI workflows, ensuring reliability of embedding-based search systems - Debugged and resolved issues in production AI services, improving system stability and uptime - Improved embedding and indexing strategies to enhance retrieval accuracy at scale - Built and maintained API integrations for AI modules and services	

PROJECTS

CrisisWeave – Agentic AI Crisis Intelligence System (Github) (Demo)	April 2026
- Built an AI-driven crisis intelligence system for emergency transcript analysis and incident prioritization - Developed scalable REST APIs and an ML-powered pipeline for deduplication and priority scoring - Integrated LLM-based reasoning to deliver explainable insights through an interactive dashboard	
Knowledge Graph Q&A System (Github) (Demo)	March 2026
- Built a hybrid knowledge graph + semantic retrieval system for multi-hop document Q&A over unstructured PDFs. - Designed entity–relationship extraction pipeline with graph-based reasoning to answer queries beyond simple vector search. - Combined graph traversal, embeddings, and keyword search to benchmark and improve answer accuracy.	
Agentic AI Real Estate Price Intelligence System (Github) (Demo)	February 2026
- Built an agentic ML system for property price prediction using multi-agent workflows, regression, and ensemble models. Orchestrated LangGraph agents for adaptive model selection, feature engineering, and evaluation across prediction and classification tasks. - Implemented data preprocessing pipelines and self-correcting feedback loops to improve model accuracy.	

SKILLS

AI / ML: Machine Learning, LangChain, GenAI, LangGraph, Scikit-learn, Hugging Face, TensorFlow, LLM, Generative AI
APIs & Testing: Postman, API testing, API
Cloud & DevOps: Git and Github, Docker
Computer Languages: TypeScript, HTML, CSS, JavaScript, Python, SQL
Courses: Data Structure
Databases & Data Tools: PostgreSQL, Firebase, Power BI, Tableau, Excel, MySQL, MongoDB
Domain & Business Skills: Figma, UI/UX
Frameworks & Libraries: Pandas, Matplotlib, Tailwind, Next.js, Tailwind CSS, Zustand, Framer Motion, Prisma ORM, NumPy, React, Node.js, Bootstrap, Express JS
Soft Skills: Verbal/nonverbal communication, Leadership, Time management, Critical Thinking, Problem-Solving, Presentation Skills, Communication Skills
